

Jose Arpaia Quintero

Systems and Computing Engineer | Full Stack Developer

@josearpaiaquintero@gmail.com Github LinkedIn Portfolio Panama Worldwide

Professional Profile Systems and Computing Engineer with **over 4 years of experience** as a **FullStack and Frontend Developer** in hybrid and remote environments. Strong command of the modern tech stack, including **JavaScript, React, Vue, Next, Express, Nest, Laravel, Go, and Flutter/Dart**. Proven experience in developing and maintaining **scalable applications (Angular/Ionic)**, translating designs (Figma) into **pixel-perfect** interfaces, and integrating **third-party APIs** to enhance functionality. Effective collaborator in **Agile/Scrum** methodologies and expert in using **Git Flow** and tools like Docker. Focused on code quality, application performance, and client satisfaction.

- Experience

BlueCore S.A.

Full Stack Developer

<https://www.bluecorela.com>

November 2024 - Present

Hybrid - Panama City

- Performance Optimization:** Reduced load times for a critical module by **85%** (from 20s to 3s) by implementing parallel requests (concurrency) to legacy backend services.
 - Technical Leadership:** Led the frontend design and development for a Bank Data Update Module, managing complex flows, conditional validations, and multiple user profiles.
 - Mobile Development:** Specialized in the **Ionic/Angular** ecosystem to deliver robust solutions for banking entities in Panama, ensuring a fluid user experience (UX) under strict business requirements.
- Etyalab S.A.

Frontend Developer

<https://www.etyalab.com/>

November 2021 - November 2024

Remote - Panama City

- Multi-project Development:** Participated in the full development cycle of web and mobile applications for various industries (Insurtech, Administrative Dashboards, and Gaming).
 - Technological Versatility:** Implemented solutions using a diverse tech stack, demonstrating high adaptability between frontend frameworks (**Vue, React, Flutter**) and backend frameworks (**NestJS, Express, Laravel**).
 - Product Delivery:** Direct collaboration in building products from conception to deployment, ensuring functionality required by different client profiles.
